

Mobile protective screens

303/B2 and 303/B3

These mobile x-ray protective screens have a solid panel design with a lead core. All screens are finished on both sides with a light grey high pressure plastic laminate and are edged in satin aluminium with a smooth rounded profile. Other colours are available to order. Window protection is 2 mm lead equivalent and lead thickness increased to 2.24 mm. Screens are equipped with robust legs and high quality lockable castors and fitted handles for easy movement.

Specifications
