

Accessory rail for tableside mounted equipment

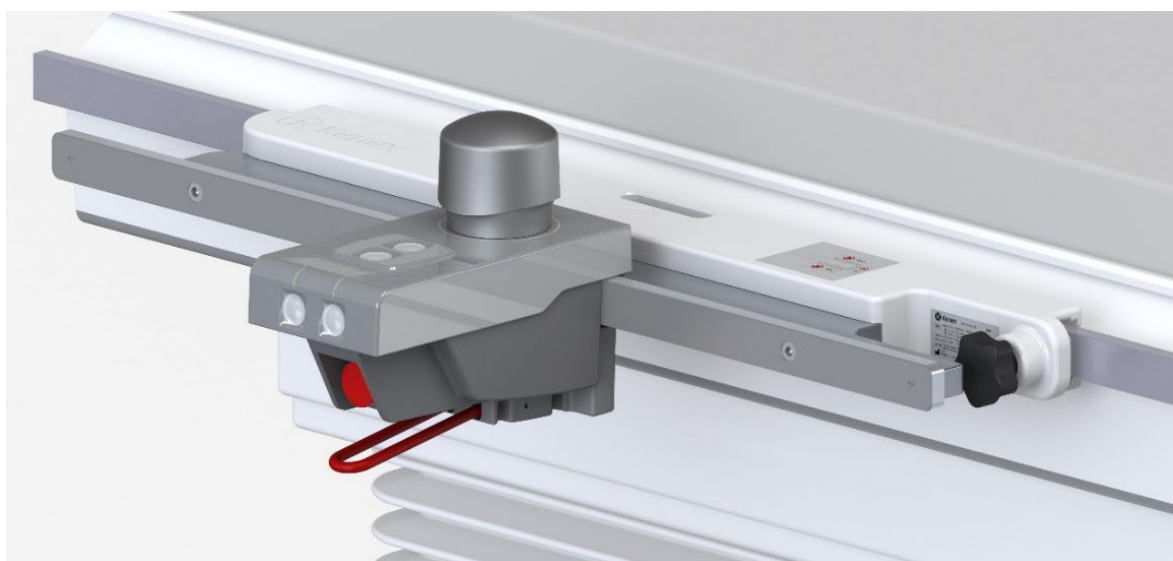

312/DS-099 - Multi-purpose spacer rail

Supplied with:

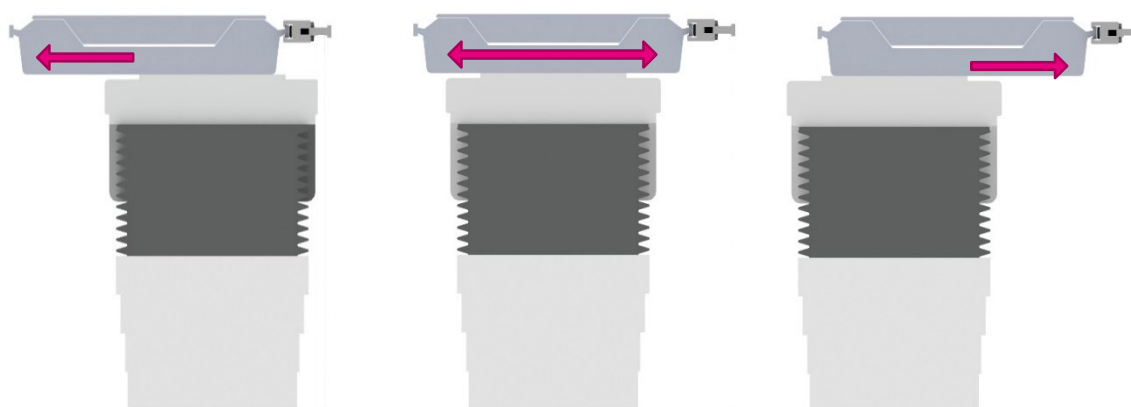

1 off 25 mm x 10 mm x 65 cm long integrated accessory rail (fitted)

1 off 28.6 mm x 9.5 mm x 65 cm long integrated accessory rail

Multi-purpose accessory rail for attachment of tableside rail equipment
(for use with an extended lateral moving tabletop)

This multi-purpose accessory rail allows tableside mounted equipment to be used on a table featuring extended lateral tabletop movement. Rail accessories which would otherwise strike the table pedestal, are positioned outside of this movement range (see below). An attachment bracket slides onto a 25 mm high, or 28.6 mm high tableside accessory rail (maximum 11 mm thick). The securing handle position allows the shield to overhang the rail end and be repositioned further along the table if required.
