

Wall rack

312/W-LB

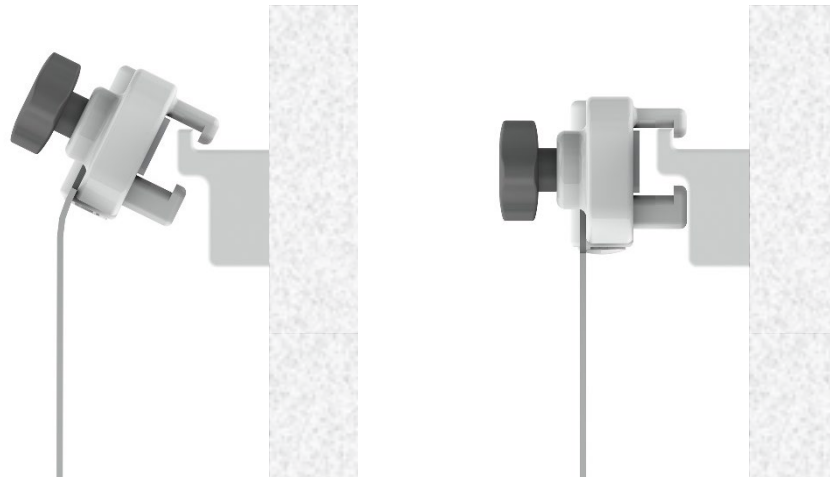

Wall rack for Kenex lower body radiation shields

This wall rack provides a secure storage location for Kenex lower body radiation shields (type 312). The unique design utilises strong engineering plastic to effectively store a shield of any size.

Shield not included

Technical information

Any Kenex lower body radiation shield (type 312) can simply 'rotate onto' the wall rack. This docking feature minimises the required wall space, as the shield does not need to be slid on laterally.

Weights & dimensions

Width: 400 mm Depth: 37 mm
Height: 55 mm Weight: 0.8 kg

Wall fastenings are not included.

Supplementary products

Wall rack for top shields: 312/W-TOP

Effective storage for removable top shields (type 312, standard or reduced height).

Mobile racks for table shielding: 1342/A2
