

# Wall rack

312/W-LB

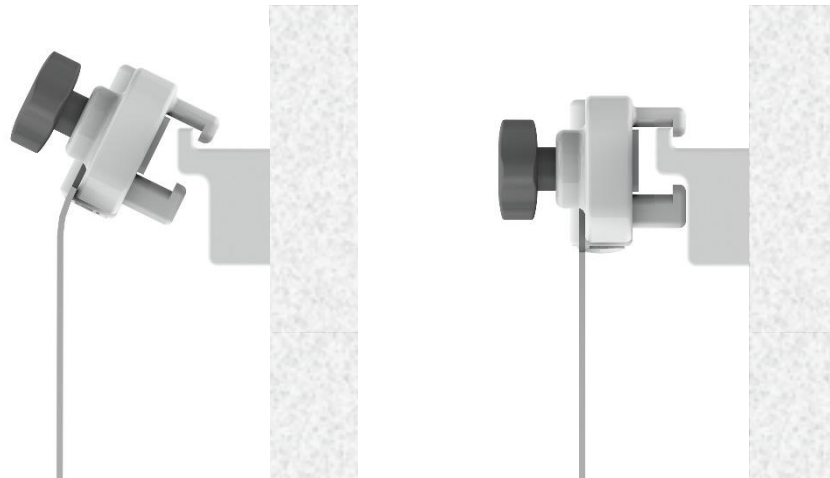

## Wall rack for Kenex lower body radiation shields

This wall rack provides a secure storage location for Kenex lower body radiation shields (types 311 & 312). The unique design utilises strong engineering plastic to effectively store a shield of any size.

Shield not included

## Technical information

Any type 311 or type 312 Kenex lower body radiation shield, can simply 'rotate onto' the wall rack. This docking feature minimises the required wall space, as the shield does not need to be slid on laterally.

## Weights & dimensions

Width: 400 mm      Depth: 37 mm  
Height: 55 mm      Weight: 0.8 kg

## Supplementary products

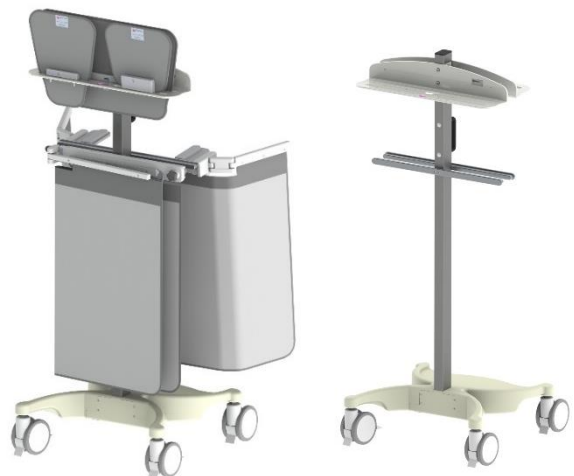

### Wall rack for top shields: 312/W-TOP

Effective storage for removable Kenex top shields.

### Mobile rack for table shielding: 1342/A2

Effective mobile storage combinations for lower body table shields (types 311 & 312), removable Kenex top shields and optional head end shields (types 313).

Please note shielding is not included and is shown here for display purposes only. Further information on these products is available on our website and by downloadable data sheet.
