

Head end table shield

313/A2-008

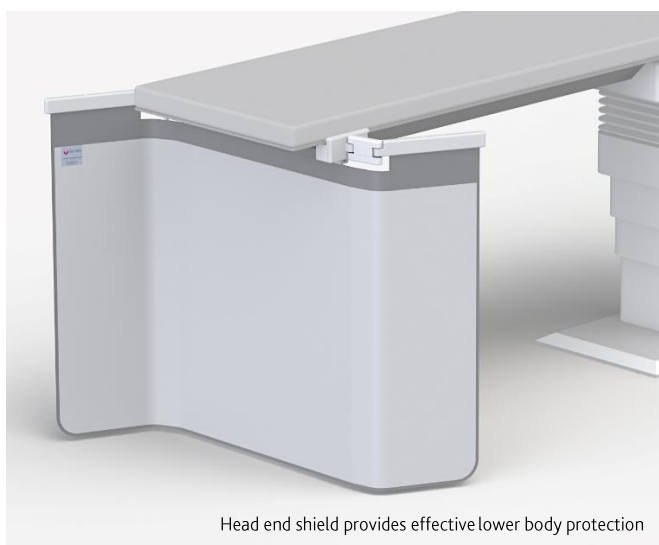

(Shield & wall rack for use with a 550 mm wide Artis zee multipurpose (MP) table)

Shield & wall rack for use with a carbon fibre table

This lower body shield substantially reduces exposure to scatter radiation emanating from a carbon fibre table or patient's body. It easily slides onto the head end and protects physicians or others standing close-by. It comprises a lightweight and durable structure, with middle link and pivotal side arms supporting a flexible inner 0.5 mm lead equivalent lead curtain.

Features

- > The shield slides onto the carbon fibre top and maintains its position by means of an internal friction pad, which allows simple positioning, but prevents unwanted slip, even when the table is tilted.
- > The two pivotal side wings can be formed around the user, extended along the table or folded neatly away according to preference. They can be quickly and easily moved to allow full C-arm movement.
- > The shield easily slides onto its bespoke wall rack thereby allowing convenient storage. Once secured to the rack, the shield arms fold neatly to reduce wall space.

Head end shield provides effective lower body protection

Weights, dimensions & ordering information

Weights and dimensions are subject to manufacturing tolerance

Product code: 313/A2-008

Total width: 122 cm
 Central section: 58 cm
 Pivotal arms: 32 cm each side

Height: 80 cm

Shield weight: 10.5 kg

Included wall rack
