

Lower lead panels for suspended shielding

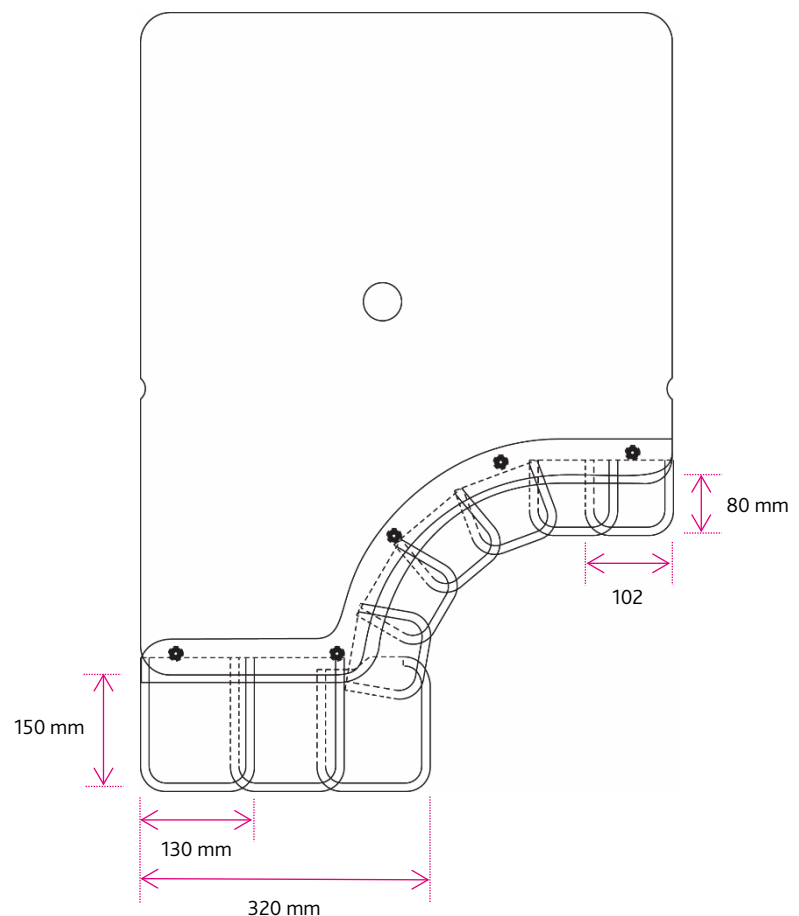

354 & 351 (with patient contour corner cut-out)

Extend your upper body protection

These lead acrylic suspended shields can be factory fitted with an optional 0.5 mm Pb equivalent curtain. Fitted to the lower profile these flexible curtains extend the protection from scatter radiation emanating from the patient's body. Bespoke lengths are also available by request.

354/P/LR

- > Factory fitted.
- > For use on a 354 shield, 76 cm x 61 cm with a patient contour corner cut-out.
- > 0.5 mm Pb equivalent curtain, fitted across the 61 cm lower profile (354/P/LR).
- > Bespoke lengths available.

351/P/LR

- > Factory fitted.
- > For use on a 351 shield, 60 cm x 80 cm with a patient contour corner cut-out.
- > 0.5 mm Pb equivalent curtain, fitted across the 80 cm lower profile (351/P/LR).
- > Bespoke lengths available.
