

Removable lift-off top shields

312/E/025 (34 cm high removable top shields – set of three)
 312/E/027 (24 cm high removable top shields – set of three)

For use on Kenex lower body tableside radiation shields

Compatible with all 312 table shields (114 cm wide and larger)

Kenex top shields are manufactured using the same 0.5 mm Pb protective material as the suspended curtains of the main shield. They include a flexible plastic material that enables them to stand above the tableside rail, providing additional higher and wider protection to the user. Their unique shape (wider at the top) ensures that no gaps develop as the adjacent tops are pushed towards the patient during procedures.

Standard height (312/E/025)

- > 1 off set of three removable lift-off tops (1 x 57 cm & 2 x 27 cm wide).
- > Height of tops, 25 cm above tableside accessory rail.
- > Solid stainless steel locating pins ensure each top remains in position during use.
- > Each can be removed quickly and easily as required.

Reduced height (312/E/027)

- > 1 off set of three removable lift-off tops (1 x 57 cm & 2 x 27 cm wide).
- > Height of tops, 15 cm above tableside accessory rail.
- > The height reduction (10 cm shorter) allows for continuity of protection to the user, whilst removing interference when performing radial access catheterisation procedures.
- > Solid stainless steel locating pins ensure each top remains in position during use.
- > Each can be removed quickly and easily as required.

Optionally available wall rack (part number 312/W-TOP)
