

Head end table shield

313/A2-010

(Shield & wall rack for GE Healthcare Elegance Tables)

Shield & wall rack for use with a carbon fibre table

This lower body shield substantially reduces exposure to scatter radiation emanating from the carbon fibre table or patient's body, with each of the three sections carrying a flexible 0.5mm lead equivalent curtain. The shield is supplied with a table top adaption bracket allowing it to easily attach to the head end. The two side curtains (one 24 cm wide, one 68 cm wide) can each attach to the left or right side of the central section to provide 119 cm width of protection. Three lightweight lift-off top shields (23 cm high x 29 cm wide) are included to increase protection above the table top, with each easily removed and stored on the supplied wall rack. Each section of the shield can be stored on the same rack when not in use, along with the carbon fibre adaption bracket.

Features

- > The shield clamps to the supplied carbon fibre top adaption bracket
- > The pivotal side wings can be formed around the user, extended along the table or folded neatly away according to preference. Each can be quickly and easily switched to the opposite side of the table
- > Each side wing can be easily moved to allow full C-arm movement
- > The shield, tops and carbon fibre top adaption bracket easily attach to a bespoke wall rack thereby allowing convenient storage using minimal wall space

Shield & Tops

Weights, dimensions & ordering information

Product code: 313/A2-010

Total width: 119 cm

Central section: 37 cm wide

Small pivotal arm: 24 cm wide

Large pivotal arm: 68 cm wide

Shield height (excluding tops): 60 cm

Shield height (including tops): 83 cm
