

# Head end table shield

313/A2-018 (for use with 520 mm wide tables - Carbon FloatLine and SQ14 X-TRA)

## Head end shield for use with a carbon fibre table

This lower body shield substantially reduces exposure to scatter radiation emanating from a carbon fibre table or patient's body. It easily slides onto the head end and protects physicians or others standing close-by. It comprises a lightweight and durable structure, with middle link and pivotal side arms supporting a flexible inner 0.5 mm lead equivalent lead curtain.

## Features

- > The shield slides onto the carbon fibre top and maintains its position by means of adjustable clamps, which allow simple positioning, but prevent unwanted slip, even when the table is tilted.
- > The two pivotal side wings can be formed around the user, extended along the table or folded neatly away according to preference. They can be quickly and easily moved to allow full C-arm movement.
- > The wall rack provides convenient storage after use. Once secured to the rack the shield side wings fold neatly inwards to reduce wall space.

Head end shield provides effective lower body protection

## Weights, dimensions & ordering information

Weights and dimensions are subject to manufacturing tolerance

**Product code:** 313/A2-018

**Shield width (total):** 120 cm

Central section: 56 cm

Pivotal arm: 32 cm each side

**Shield height:** 80 cm

### Weights

Shield: 12.1 kg

Wall rack: 2.2 kg

Wall rack storage included
